Reasons for Allowance

The following is an examiner's statement of reasons for allowance: Nothing in the prior art anticipates or suggests, "a region generator coupled with the accumulator for indicating at least one active region for the pixel and at least one new region, each of the at least one active region intersecting a portion of the pixel, the at least one new region being based on an intersection between the at least one active region and the fragment, a first portion of the at least one new region indicating where in the pixel the at least one active region and the fragment intersect, a second portion of the at least one new region indicating where in the pixel the at least one active region and the fragment do not intersect, the region generator indicating the first portion of the at least one new region to be blended, the region generator further including the region list for indicating the at least one active region for the pixel; the intersection generator coupled with the region list determining at least one new region for the at least one active region and providing the region list with the at least one new region" in a system for providing anti-aliasing of a graphical image. The amended claimed invention of 02/22/2005 would provide antialiasing using *fewer blending units*, thereby decreasing overall system size, generally without adversely impacting performance which is not shown by the prior arts. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
